Office Action Summary

U.S. Patent and Trademark Office PTO-326 (Rev. 11/00)

Part of Paper No.

Serial No. 10/068,005 Art Unit 1762

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-7, drawn to an apparatus for a vacuum system in an ion implantation apparatus, classified in Class 118, subclass 723.0FI.
- II. Claims 8-10, drawn to a method for evacuating or flushing, and cleaning and repairing an ion implantation system including an ion generator, classified in Class 427, subclass 523+.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus requires a valve structure not used in the method claims. Also, the method requires cleaning, repair and flushing steps that need not be employed in the apparatus.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as

Art Unit 1762

-3-

shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

- 4. A telephone call was made to Eugene Lee on June 3, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. No response to the telephone call was received by 6/12/03.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Any inquiry concerning this communication should be directed to M. L. Padgett from Monday through Friday from about 8 A.M. to 4:30 P.M. at telephone number (703) 308-2336 and FAX #703 872-9310 (official), 872-9311 (official after final) and 305-6078 (unofficial).
